The Faculty of Pain Medicine and the Continuing Professional Development Committee warmly welcome you to the Refresher Course Day.

**Refresher Course Day and Faculty Dinner**

Crowne Plaza, Auckland, New Zealand

**Friday April 29, 2016**

The Faculty of Pain Medicine and the Continuing Professional Development Committee warmly welcome you to the Refresher Course Day.

**Extremes of Pain**

We have three exciting international speakers. Our third international speaker is Dr Steven Cohen (FPM New Zealand Visitor) is Professor of Neurology at University College, London. He has made pivotal contributions to understanding the mechanisms of the brain’s normal and pathophysiological response to pain. He has also trained a new generation of neurologists interested in pain medicine, to the trainees and health professionals.

We have two Australian speakers headlining the program. We have three exciting international speakers. **Dr John Pereira**

**Dr Jane Thomas**

Dr Steven Cohen is a Professor at the University of California, Los Angeles. His research interests include the role of the brain in pain processing and treatment. He has collaborated extensively with pain researchers, including colleagues at the McGill Pain Centre and his research institute. He has also made significant contributions to understanding the mechanisms of the brain’s normal and pathophysiological response to pain. He has also trained a new generation of neurologists interested in pain medicine, to the trainees and health professionals.
