The Faculty of Pain Medicine warmly welcomes you to the Refresher Course Day 2017. The meeting will be held on Friday May 12, immediately prior to the ANZCA/FPM “Think Big” Annual Scientific Meeting (ASM). The Faculty of Pain Medicine will continue its strong support of pain and will fulfill its big challenge involved in specific types of pain such as paediatric and pelvic pain. It will also give practical tips on how to specifically manage persistent pain. It will examine how we interpret big data, create big networks for pain management across vast distance yet apply this to our specific patients.

We have two exciting international speakers headlining the program. Professor Christopher Eccleston from the Centre for Pain Research, University of Bath, UK is an authority in the development as a Member of Scientific Research Committee (Marie Curie); Field Editor for Psychology, PAIN and a coordinating editor of Pain, Palliative and Supportive Care Cochrane Review Group. His research interests include evidence based pain management, self-management of chronic illness; assistive rehabilitative technology; supportive care; clinical trials; reviewing the evidence base of management for chronic pain; and clinical trials of biological, psychological, physical and other interventions to prevent, manage and treat chronic pain.

Dr Suellen Walker, Clinical Senior Lecturer and Honorary Consultant in Paediatric Anaesthesia, Great Ormond Street, UK will complement Christopher’s knowledge with expertise in paediatric anaesthesia, acute and chronic pain management. Her research focuses on evaluating age-related changes in pain responses, the long-term effects of early pain and injury and developmental pharmacodynamics of analgesic drugs.

They are supported by a very talented group of experts from Australia and New Zealand involved in specific types of pain such as paediatric and pelvic pain. It will also give practical tips on how to specifically manage persistent pain. It will examine how we interpret big data, create big networks for pain management across vast distance yet apply this to our specific patients.

The theme “Big specifics” will complement the ASM and will deal with the big challenges involved in specific types of pain such as paediatric and pelvic pain. It will also give practical tips on how to specifically manage persistent pain. It will examine how we interpret big data, create big networks for pain management across vast distance yet apply this to our specific patients.

**Organising Committee**
- Dr Kathleen Cooke
- Dr Jayne Benyon
- Dr Paul Gray
- Dr Sarah Lindsay
- Dr Richard Perreault
- Dr Joann Rotherham

**Faculty dinner**
Brisbane Powerhouse
119 Larrington Street, New Farm, Brisbane
Brisbane Powerhouse is a contemporary space on the beautiful banks of the Brisbane River. The venue on the former power station has become a distinct Brisbane landmark, both as a stunning venue and perfect setting as a hub for arts.

Dr Suellen Walker, Clinical Senior Lecturer and Honorary Consultant in Paediatric Anaesthesia, Great Ormond Street, UK will complement Christopher’s knowledge with expertise in paediatric anaesthesia, acute and chronic pain management. Her research focuses on evaluating age-related changes in pain responses, the long-term effects of early pain and injury and developmental pharmacodynamics of analgesic drugs.
